## Detailed Professional Experience

---

2017

### Pasar Sukodono

#### Public Market Research and Development

An accountant is required to study the accounting related activities that happens in the field. As an internship, I responsible to help the market management to develop the market into a national standard market. In the process, the market is required to meet several conditions and stages before declared as a national standard market.

My works are focused on defining strategy, strengthen the market governance, and creates market zonation. From the research, it concludes that the market needs to focus on managing the market zonation referring the government regulation. With the help of market management, layout rearrangement was conducted. As it conducted, I am also help in recollecting merchant's data and some briefing to the market management and merchants for the preparation of market assessment. The final goal is to get the national standard title for the market based on government regulation.
